- jitendra-labs.github.io/portfolio

Full Stack Software Engineer with 7+ years of experience designing scalable, high-performance applications using Node.js, Python, React.js, and Microservices. Experienced in AI-powered applications, LLM integration, RAG pipelines, REST APIs, and distributed systems. Proven track record of leading complex projects, driving system design, and mentoring engineering teams.

SKILLS

- **Programming & Frameworks:** JavaScript (Node.js, NestJS, React.js), TypeScript, Python (FastAPI)
- **AI / ML:** LLM Integration (Gemini, OpenAI), Prompt Engineering, Ollama, RAG Pipelines, Vector Embeddings, OCR
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, pgvector
- **Cloud & Tools:** AWS, Docker, CI/CD, RabbitMQ, Git, AWS S3
- **Architecture & Practices:** Microservices, REST APIs, System Design, Scalable Architecture, Event-Driven Architecture, Agile/Scrum
- **Soft Skills:** Team Leadership & Mentoring, Communication & Collaboration, Problem-Solving, Adaptability

WORK EXPERIENCE

CODELOGICX TECHNOLOGIES, KOLKATA

Senior Software Engineer, Sep 2023 – Present

- Led a team of 6 engineers in designing and developing scalable microservices and full-stack solutions using Node.js, Python, NestJS, and Docker.
- Delivered a workflow automation system (Zapier alternative) that automated 80% of repetitive tasks and enhanced integration efficiency by 45%.
- Optimized API performance, reducing response time by **35%** while improving application security.
- Mentored engineers through code reviews, technical design discussions, and knowledge-sharing sessions, improving overall code quality.

VOYAGERMAN TECHNOLOGY, KOLKATA

Software Engineer, May 2019 – Aug 2023

- Led full stack development, managing architecture decisions and end-to-end delivery.
- Guided team through requirements, system architecture, and development lifecycle.
- Collaborated with stakeholders to align product features, achieving 95% client satisfaction.

PROJECTS

PR-Lens – GitHub AI PR Review System

June 2026 – Present

- Built a GitHub App that automatically reviews pull requests using a multi-tool static analysis pipeline and AI-generated commentary.
- Integrated LLM (Gemini, Ollama) to generate structured inline review comments posted directly on GitHub PRs.
- Technologies: Python, FastAPI, Gemini AI, Ollama, PostgreSQL, GitHub App, Docker.

DocMind AI – Document Intelligence Platform

June 2026 – Present

- Built a full RAG pipeline – upload any medical PDF document, chunk it into vector embeddings, and chat with it using a local LLM.
- Used Llama 3.2 with all-MiniLM-L6-v2 embeddings stored in pgvector for semantic retrieval.
- Technologies: Python, FastAPI, Ollama / Llama 3.2, PostgreSQL, pgvector, RAG, OCR, Docker.

Zoma

Oct 2025 – Present

- Developed project estimation system using Node.js, Python, Postgres, Redis, and Docker.
- Automated company and sandbox account setup, reducing manual effort by 95%.
- Built a multi-layered LLM-based AI assistant leveraging Gemini and ChatGPT models.
- Maintained CI/CD pipeline for reliable deployments across environments.

Linear Health

Nov 2024 – Oct 2025

- Developed patient engagement and workflow automation system using Node.js, NestJS, Postgres, Redis, and Docker.
- Maintained CI/CD pipeline ensuring zero-downtime deployments, boosted workflow efficiency and reduced manual effort by 25%.

Vardian

Sep 2023 – Mar 2025

- Built SaaS platform for asset management and reporting with React.js frontend and Node.js microservices backend.
- Implemented offline sync and real-time messaging with RabbitMQ, Getstream, and Pusher, enhancing reliability.

MDG

Apr 2024 – Present

- Created OCR-driven shipment tracking system integrating multiple manufacturer data sources.
- Technologies: Python (FastAPI), Node.js, Postgres, React.js, Docker, AWS S3.
- Improved data accuracy and reporting efficiency by 35%.

Jobs In Education (ATPL)

Jun 2020 – Jul 2023

- Built job portal with features such as job search, resume builder, and employer dashboards.
- Technologies: Node.js, Express.js, PHP, CodeIgniter, MongoDB, MySQL, React.js.
- Increased platform usage by 50% among targeted education sector employers.

Supplier Registration (ArcelorMittal Group)

Oct 2019 – Feb 2022

- Designed multilingual supplier registration system with admin review workflows.
- Technologies: Node.js, Express, PHP, CodeIgniter, MySQL, React.js.

Product Management (Liberty Steel Group, UK)

Apr 2021 – Nov 2021

- Developed REST APIs powering mobile applications for product lifecycle management.
- Optimized backend performance using Node.js and MySQL.

E-commerce (Mallcom India)

Aug 2019 – Sep 2021

- Delivered full-stack e-commerce platform with admin panel and blog features.
- Technologies: PHP, CodeIgniter, MySQL, JavaScript.

EDUCATION

MCA – Mangalayatan University, Aligarh (U.P) | 2024 – Pursuing (Expected 2026)

BCA – Monad University, Hapur (U.P) | 2015 – 2018

Higher Secondary – K.L.S Hindi Vidyalaya, Kolkata | 2012 – 2014

Secondary – S.V.N Residential High School, Giridih, Jharkhand | 2012

CERTIFICATIONS

Professional Software Development Training – PHP Kolkata | Dec 2018 – May 2019

LANGUAGES

English, Hindi, Bengali
